ISSUP Newsletter: Issue 4

This newsletter is all about you. In this edition we feature articles and stories submitted by our members. Our members have shared valuable resources including a review that assesses the **effectiveness of substance use treatment for young people**, as well as a study that examines **the relationship between school sports participation and marijuana use**. This edition also includes articles that shed light on **substance use prevention and treatment efforts in Mexico, Afghanistan and Pakistan**.

Did you know that you could share your stories with us? Follow this [link](#) to add to our Knowledge Share.

We need your help and input! We are currently reviewing how we classify our members to ensure it adequately represents what we want to communicate. We would really welcome your input on the terms we should use for membership levels. At the moment, we offer two levels of membership: ISSUP “Member” and ISSUP “Associate”. The idea is that ISSUP Members will have more experience, qualifications and credentials in the fields of substance use prevention and/or treatment than ISSUP Associates. Please fill out this short [survey](#) to help us select new and more appropriate names for our membership classification.

If there's anything else you'd like to read about in our newsletter or see on our website, feel free to send us an email at info@issup.net.
