ISSUP Newsletter: Issue 6

This week we throw the spotlight on ISSUP's virtual platform for exchanging new ideas, the latest news, research and resources, as well as information on current and past events in the field of substance abuse prevention and treatment. We call this the **Knowledge Share** and it can be accessed by clicking here.

This edition also includes an updated version of the publication *Prevention* of Substance Abuse by the European Monitoring Centre for Drugs and Drug Addiction (EMCDDA). Global in scope, it provides an up-to-date review of prevention science. We also feature a study that links aggression to substance use. And you can delve into a new piece of research which suggests that global smoking rates have decreased following the introduction of a number of demand-reduction measures.

Visit <u>our website</u> for more of the latest information from the field of drug prevention and treatment. If there's anything else you'd like to read about in our newsletter or see on our website, feel free to send us an email at <u>info@issup.net</u>.
