

ISSUP Newsletter: Issue 26

We would like to take this opportunity to share information about an exciting upcoming event for universities interested in addiction studies.

[The International Consortium of Universities for Drug Demand Reduction \(ICUDDR\)](#) will hold its [third annual conference](#) in **San Diego from June 4 - 5, 2018**. This conference offers a great opportunity to learn about substance use university education, training, research, international collaboration and networking, and substance use professionals.

ICUDDR's President, Michal Miovsky, said that, "This year the conference will include presentations that address trends in developing academic programmes in addiction studies, the current science on substance use disorders and addiction treatment and prevention, examples of how universities around the world are implementing programmes in addiction studies, and a unique Dean's track to engage these important leaders in our institutions of higher learning. Your experience and knowledge in these areas will be vital to the success of the conference." [Follow this link for more information about the conference!](#)
