ISSUP Newsletter: Issue 28

This newsletter is filled with a **range of interesting guidelines and resources**, including the second edition of the **International Standards on Drug Use Prevention**. The document offers guidance for policymakers and global stakeholders interested in prevention and the implementation of drug prevention strategies. As part of an Expert Group, our Executive Director at the time, Jeff Lee, took part in the consultation process of updating the Standards.

This edition also features a set of revised guidelines that aim to provide treatment professionals with evidence-based information to **assist with the management of co-occurring substance use and mental health disorders**. Another useful resource for **substance use professionals specialised in treating alcohol use disorders** is also included in this week's edition. Read on and start browsing our newly added guidelines and resources!

As always, to keep up-to-date with the latest news, resources and events in substance use prevention and treatment, follow us on [Facebook](#) and [Twitter](#) and visit [our website](#).
