

# Developing Sustainable DDR Workforce Development Infrastructure

Kim Johnson, PhD ICUDDR Executive Director ISSUP, Vienna 2019

### Access and Engagement In Care

In every country we have problems providing access to and engagement in care.

## The Goal: A Learning Health System

#### **EVALUATE**

Collect data and analyze results to show what works and what doesn't.

#### **ADJUST**

Use evidence to influence continual improvement.

In a learning health care system, research influences practice and practice influences research.

#### DISSEMINATE

Share results to improve care for everyone.

#### **IMPLEMENT**

Apply plan in pilot and control settings. INTERNAL AND EXTERNAL SCAN

Identify problems and potentially innovative solutions.

#### **DESIGN**

Design care and evaluation based on evidence generated here and elsewhere.
