## ISSUP Newsletter: Issue 46

### Welcome to our latest newsletter!

The focus of this week's newsletter is the new [Networks](#) section of our website. Networks are online **defined interest groups** that allow health care professionals, researchers, practitioners and others working in the drug demand reduction field to share research, success stories, resources and information on best practice within a virtual setting.

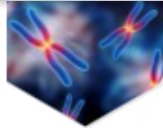

There are three types of networks that you can belong to:

1. **Self-organising interest groups:** These are **publicly** browsable networks. They are a space for ISSUP members to share and discuss aspects of their work. Anyone can create or join one of these networks.
2. **Organised private groups:** These are **invitation-only** and provide a space where identified individuals can share ideas and resources regarding a specific issue within a particular group.
3. **Geographic regions:** Members are automatically joined into their regional network.

Below we have included links to a selection of networks that have already been established. You may be interested in finding out more about [alcohol](#), [genetics](#) or perhaps you wish to express [thank you](#) to friends and colleagues working in the field.

We hand it over to you! We hope that you will find, create and use networks to **collaborate** with other ISSUP members and **establish new connections**.

[Subscribe](#)[Past Issues](#)[Translate](#) ▼

## Genetics

 ▼

Network is dedicated to discussing the genetics of substance use dependence.

[Genetics Network](#)

## Honourable Men...

 ▼
