National Recovery Month

September is recognised as [National Recovery Month](#) in the United States - **a time to raise awareness and celebrate recovery**. Over the years **Recovery Month** has promoted and supported new evidence-based treatment and recovery practices, the strong and proud recovery community, and dedication of service providers and community members across the nation who make recovery in all its forms possible.

To recognise the campaign, the [U.S. Department of State's Bureau of International Narcotics and Law Enforcement Affairs \(INL\)](#), has released a [video](#) that shows their support for prevention, treatment and recovery efforts worldwide.

INL helps policy makers
create international standards,
build effective treatment systems
and improve the quality of services.

It has been another busy month for ISSUP! All focus has been on prevention as we made our way to Ghent for the **European Society for Prevention Research Conference** where we shared ISSUP with colleagues in the prevention field.

We would also like to draw your attention to the newly published [European Prevention Curriculum](#). Earlier this week the [European Monitoring Centre for Drugs and Drug Addiction \(EMCDDA\)](#) released a handbook designed for **decision, opinion and policy makers in science-based prevention of substance use**. The handbook is an adapted and shortened version of the [Universal Prevention Curriculum](#) and based on the [International Standards on Drug Use Prevention](#) and the [European Drug Prevention Quality Standards \(EDPQS\)](#).
