WORKSHOP OBJETIVES

CONTENT DEVELOPED BY

Help participants to develop activities and practical interventions that can prevent the harmful use of legal and illegal drugs in schools, based on scientific evidence and the reality of the school and its region.

The Research and Development Institute - UTRIP, from Europe, is a non-governmental and non-profit research institute. It aims to conduct research, develop, implement, monitor and evaluate projects and programs in the field of risky behavior for young people, addiction prevention, health promotion and healthy lifestyle. Member of the European network of NGOs in the field of alcohol policy (Eurocare), the Civil Society Forum on Drugs (CSF), the European Prevention Research Society (EU SPR), the Academic Science for Prevention Network (SPAN) and the European Alcohol Policy Network (APN).

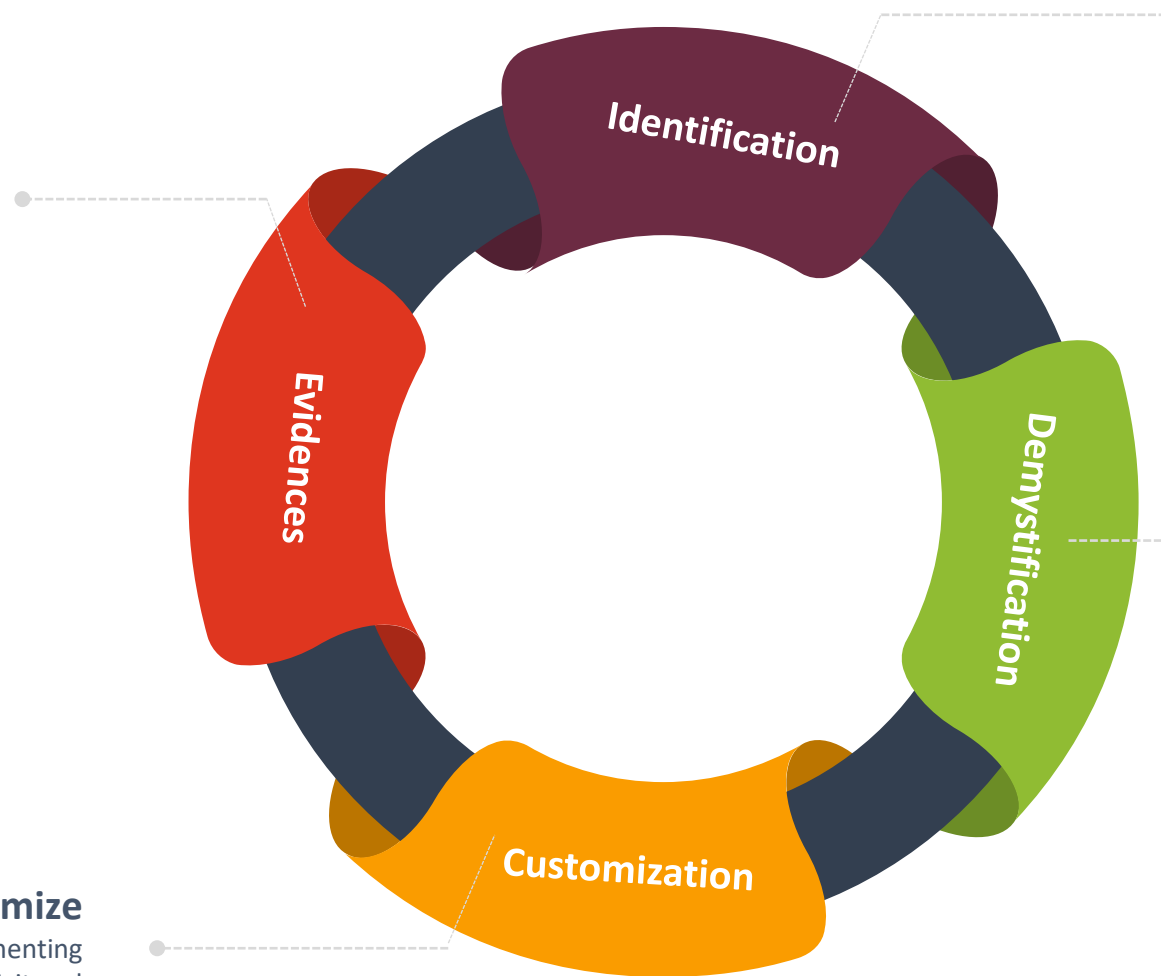

THE WORKSHOP IS BASED ON THE FOLLOWING FOUNDATIONS

Scientific Evidence

Everything must be done based on scientific evidence and local realities, must be documented and with indicators to assess the result of systematized actions.

Customize

Practical and Easy Actions for Implementing the Prevention of Harmful Use of Licit and Illicit Drugs in a given School.

Identification and Perception of the Psychosocial Environment, through the Science of Prevention.

Demystify the Pre-concepts to the abusive use of Licit and Illicit Drugs in their subjective form, example: "Everyone uses".

PROGRAM

Preliminary Topics

Video Class 1 - Introductory activity and training introduction

- a) Definitions
- b) Epidemiology
- c) Etiological Model
- d) Types of Prevention
- f) Prevention Theories

Video Class 2 - Basic notions of prevention science and practice

- a) Definition of prevention in addition to drugs
- b) Important epidemiological data for Brazil
- c) More detailed presentation of the model and etiological theories
- d) Scientific Bases of Prevention

Video Class 3 - Basics of school prevention

- a) School Climate
- b) School policy
- c) Curriculum
- d) What works and what does not work in prevention and why

PROGRAM

Preliminary Topics

Video Class 4 - Examples of good / best practices

- a) Key components of evidence-based prevention programs (for example: good behavior game, disconnected, LionsQuest, EFFEKT)
- b) How can we start building school prevention systems
- c) Role of the school prevention team and prevention coordinator (s)
- d) Relationship and collaboration with the community and parents

Video Class 5 - Environmental prevention strategies

- a) In relation to schools and the community
- b) Local prevention system and infrastructure
- c) Professionalism

•Exercises to update knowledge and skills gains

PROGRAM

Preliminary Topics

Video Class 6 - Socio-emotional learning

School / classroom climate as an important part of the comprehensive prevention strategy in schools

Video Class 7 - Prevention structure at school

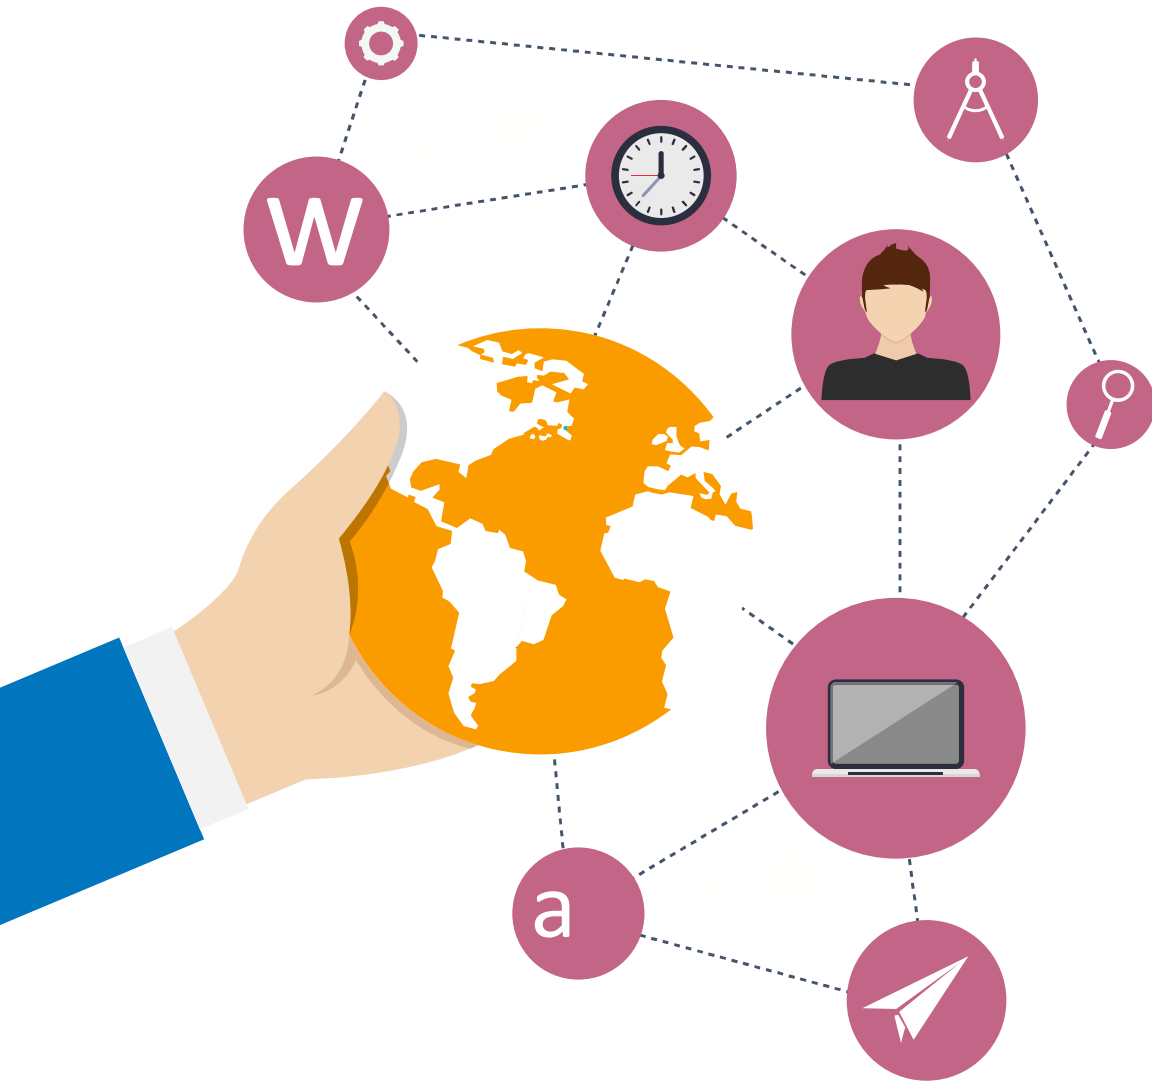

- a) School vision or policy
- b) Teamwork
- c) School prevention coordinator (s)
- c) Systematic approach
- d) Regular education and training of school staff
- e) Monitoring and evaluation
- f) Prevention in the regular curriculum
- g) Sustainability
- h) Financing
- i) Advocating for prevention

Video Class 8 - Monitoring and evaluation

- a) Why and what is important for schools
- b) Exercises to update knowledge and skills gains

VIDEO CONFERENCE– PRACTICAL WORK

On the 22th of August in the morning, for 3 hours we will have a Video Conference so that the participants can interact with the Trainers.

•Developing a concrete school prevention plan with three main components:

- a) school policy
- b) school climate
- c) evidence-based interventions

Presentation of some of the most effective and popular interventions in the Utrip portfolio

Final Test

At the end of the course we will have a knowledge test. This test is important for us to know the group's level of learning

VIDEO LESSONS - Brief Advice

These classes are to help the School to relate to the Family, through students on the issue of Drugs

Dr. João Paulo Becker Lotufo

Bonus Class Video 1 - An informal chat at school and family are worth a lot

The presence of this discussion coupled with exchanges of ideas with the family was the only positive factor in reducing drug experimentation by young people, overcoming the presence of spirituality, sports, cultural or social activities in the research we did in 10 schools in the Butantã region in Sao Paulo.

Bonus Class Video 2 – Dr. Bartô's Book – Fun Prevention

During the regular chats, teachers and parents follow a standard guideline with questions to address students and children about the drug issue. In addition, appropriate material for the age group must be distributed, such as Dr Bartô's booklets, a project implemented at the USP University Hospital (www.drbarto.com.br). The more intense and repetitive the advice, the greater the scope of our goal: zero tolerance for tobacco, zero tolerance for marijuana and zero tolerance for alcoholic beverages up to the age of 18. And remember, beer is an alcoholic beverage.

Coach 1

Sanela Talić

Director of prevention programs at the Research and Development Institute "Utrip". Researcher and PhD candidate in Prevention Science at the University of Zagreb, Croatia. She is involved in several EC-funded projects in the field of addiction prevention, health promotion and healthy lifestyles, socio-emotional learning, violence and injury prevention. She is also a researcher and PhD candidate in Prevention Science at the University of Zagreb, Croatia. She is a Master Trainer for UNPLUGGED school prevention programs (12-14 years old) and EFFEKT (parents) (www.efeekt.org), and national coordinator and Master Trainer for the Family Strengthening Program (SFP), Plus Program for boys and girls, girls, Good Behavior Game (GBG) etc. She is a member and former elected secretary of the European Society for Prevention Research (EUSPR) (two terms). Her extraordinary accomplishments are especially as follows: leadership in disseminating evidence-based prevention practices nationally and internationally, exceptional training skills that inspire trainees to work even better in practice, an exceptional advocate for evidence-based policies and practices, national and internationally. She was awarded the ISSUP Early Career Award at the fourth ISSUP conference in Nairobi (Kenya) in 2018.

Coach 2

Matej Košir

Director of the Slovenian Research and Development Institute "Utrip" and Vice President / President-elect of the International Confederation of Alcohol, Tobacco and Other Drug Research Associations (ATOD) (ICARA) Director of UTRIP (www.institut-utrip.si) . He has worked in the field of addiction prevention and public health defense for the past 20 years. He is the author, co-author and reviewer of articles and scientific articles. He was a Graduate Research Assistant at Oxford Brookes University (United Kingdom) (2015-2016). He is coordinator of the Prevention Platform network, which includes more than 40 support institutions and organizations in Slovenia. He has also been a senior advisor to the World Bank in the field of alcohol policy and prevention since January 2017. In 2017 he was awarded by the European Society for Prevention Research (EUSPR) with "Honor of Practitioner Leader in European Prevention Science"

Coach 3

João Paulo Becker Lotufo

PhD in Pediatrics, University of São Paulo. Representative of the Brazilian Society of Pediatrics in actions to combat alcohol, tobacco and drugs. Coordinator / President of the working group on Combating the Use of Drugs by Children and Adolescents at the São Paulo Pediatric Society. Responsible for the Tobacco Project of the University Hospital of USP. Responsible for the Dr Bartô Project and the Doctors of Health - Drug Prevention Project in Elementary and High School. Financial Director of ISSUP Brasil.
