**INTRODUCING  
QUALITY ASSURANCE MECHANISM  
FOR DRUG TREATMENT SERVICES  
IN CENTRAL ASIA**

## UNODC DDR activities in CA

### GLOJ71 – Treatnet II project

- Advocacy (PM training)
- Capacity building (Treatnet and UTC training packages)
- Service improvement (QA, Facility Survey, Treatnet Family)

 **UNODC**  
United Nations Office on Drugs and Crime

Working towards evidence-based drug dependence treatment and care

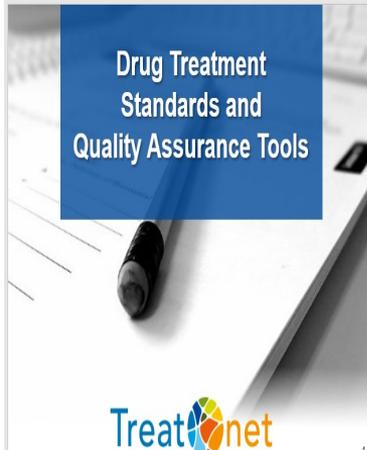

**Treatnet**

**Vision** A wide range of health and social services for all those whose lives are impaired by drug dependence

**Mission** Working together for universal access to evidence-based, comprehensive and ethical drug dependence treatment and care

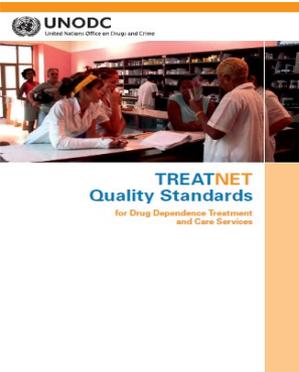

## UNODC QA tools in CA

- Treatnet Quality Standards 2012
- Quality Assurance Tools and Mechanisms 2018

Drug Treatment Standards and Quality Assurance Tools

**Treatnet**

**UNODC**  
United Nations Office on Drugs and Crime

**TREATNET**  
Quality Standards  
for Drug Dependence Treatment and Care Services

# Training of assessor team

Regional Training for Assessors on  
UNODC-WHO Quality Assurance Tools  
for Drug Dependency Treatment

22-26 October 2018,

Tashkent, Uzbekistan

27 participants (7 - KG, 7 - KG, 7 – TJ, 6 -  
UZ)

National Training for Assessors on UNODC-  
WHO Quality Assurance Tools for Drug  
Dependency Treatment

4 – 7 August 2019,

Ashgabat, Turkmenistan

12 participants

# Training objectives

---

- **Knowledge** of the International Standards, UNODC QA tools and evidence required, improvement planning and QA cycles.
- **Extensive practice scoring** of standards and criteria
- **Selection** of set of Key Performance Indicators (**KPIs**)
- **Selection of a subset of standards and criteria** for piloting areas

# Piloting process

---

- Establishment of the NEAGs
- Translation and adaptation of the UNODC QA tools
- Selection of the pilot sites and engaging drug services prior to assessment
- Timeline for conducting QA assessment
- Assess which standards and criterion apply to the service
- Shared result of QA assessment with each facility
- Received comments and feedback from each facility
- Compile report and present to the national partners
- Agree a quality improvement plan and resources required

# UNODC QA service standards

An adaptable and flexible QA system with core standards for all drug use disorder treatment services. Then intervention, setting and patient target group standards, if applicable to a service

## CORE STANDARDS

**Core management**

**Core care**

**Patients Rights**

## OPTIONAL STANDARDS

**Interventions**

**Settings**

**Patient target group**

# Evidence required in drug service QA tool

---

## Service documents:

- Annual plans, finances, clinical protocols, policies and procedures etc.
- Service monitoring data including KPI data

## Surveys to be undertaken

- Patient's survey

## 2 audits to be undertaken

- Patient records or case note audit
- Staff human resource records

## In relation to methodologies used

---

- The assessment teams appeared to combinations of national stakeholders and the services themselves
- It was positive to see an element of peer audit of services in countries
- The core methods of were used by all service assessments
- Extensive use of patient surveys and focus groups was commendable
- It was also helpful to receive data on sample sizes for the patient record and staff record audits
- Most countries gave the scores of individual services or sites
- The range of criteria selected was similar in many countries

# The key trends whether services met standards

---

- The majority of **Core Management** criteria were met
- Over half of **Core Care** standards were met
- The key trends on **Patient Rights** standards were that, in general, patients reported feeling respected
- In relation to **Intervention** standards, some countries met some criteria on having protocols for interventions – particularly opioid pharmacological interventions.
- On standards for different **Treatment Settings**; three out of four countries required improvement on outreach protocols.
- On standards for **Patient Target groups**, three countries required protocols on working with parents who use drugs including women.

# Summary of the results of QA pilot

---

- Most countries (except for Uzbekistan) chose around 35 criteria
- Uzbekistan chose an extended set of 55 standards and criteria (more Core management and Patient's rights). However, there was a limited focus on KPIs and Interventions particularly pharmacological protocols
- 15 criteria were chosen by all countries
- **Of all 353 criteria:**
  - **228 (65%) were met**
  - **80 (14%) were partially met**
  - **45 (13%) were not met**

## Results: standards chosen by most countries

**Table 2: Results of the Central Asia drug use disorder services QA Pilot: Common criteria only**

Criterion	Kazakhstan	Kyrgyzstan			Tajikistan			Uzbekistan

Tar 2A									

**Of the 15 criteria were chosen by all countries**

This comprised 135 scores. Of these

- ▶ 102 (76%) were met.
- ▶ 31 (23%) were partially met and
- ▶ 12 (9%) were not met

# Refresher training of assessor team

Online Regional Refresher Training for Assessors on UNODC-WHO Quality Assurance Tools for Drug Dependency Treatment  
12-16 October 2020,  
36 participants (6 - KG, 10 - KG, 8 – TJ, 5 – TK, 7 - UZ)

# Training focus

---

- Reflections on the achievements in Central Asia based on the findings of pilot initiatives
- Updates on ‘International Standards’ WHO-UNODC 2020 and new UNODC-WHO Services QA Toolkit and the Consensus Standards.
- Run-through on QA Standards areas with a focus on what is currently missing in Central Asia.
- Discussion on assessment methods and improvement planning.
- Identifying changes required in each country following the pilots and next steps in adopting the International QA Standards and developing National QA Standards.

# Conclusions

---

- The pilot of QA mechanisms in the 4 CA countries in 2018/19 and the refresher training was successful.
- CA countries are to be commended for their proactive and enthusiastic activities in piloting QA mechanisms in their countries.
- Delegates from all countries valued the refresher training
- Delegates from all countries were eager to take forward and implement QA mechanisms in their countries and many would welcome an opportunity to participate in CA regional QA projects.

# Next steps

---

- Conducting of 2<sup>nd</sup> phase of piloting in 4 CA countries and 1<sup>st</sup> phase in Turkmenistan
- Initiation of protocol development and implementation training in areas found to have deficits in the QA pilot and refresher training
- Development of a sustainable network of experts in Quality Assurance across the region
- Promotion of region-wide sharing of good practice between services scoring met and service scoring not met on criteria.

# Acknowledgments

---

- Prevention, Treatment and Rehabilitation Section, UNOC HQ
- UNODC Consultant
- U.S. State Department Bureau of International Narcotics and Law Enforcement Affairs (INL)
- Ministries of Health of participating countries
- National expert assessors' team
