

PERU chapter

UNIVERSIDAD PERUANA CAYETANO HEREDIA

ISSUP Virtual International Conference

Applying the principle to practice: a case-study of how the evidence-based principles for prevention has been applied, and challenges that have occurred in the practical country setting

Demonstration and Evaluation of the Universal Prevention Curriculum (UPC) School-based Prevention Interventions and Policies

Fernando Salazar Silva, Ph.D.

Universidad Peruana Cayetano Heredia

December 9, 2021

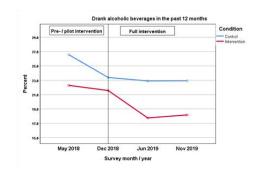

- School policy, a common approach to disciplinary policies and procedures;
- School climate, involving student norms, beliefs and expectancies, and school bonding, representing the student's relationship to the school and community;
- Prevention curricula, reinforcing prosocial attitudes and beliefs, providing personal and social skills, and focusing on decisions not to use psychoactive substances.
 - Building a school leadership team, the Prevention Leadership Action Team (PLAT).

UPC School Track training focus

Objective

To assess the effectiveness of training prevention professionals on evidence-based prevention interventions and strategies as one way to bring effective programming into a school setting in Peru.

C7- Positive Classroom Climate C8 - Interactive Teaching Skills

Positive Classroom Climate

Interactive Teaching Skills

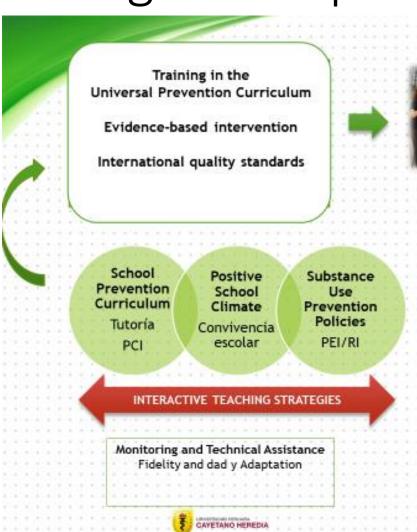

Interactive Teaching Skills and Positive Classroom Climate

Building PLATS and Establish the conditions for prevention and link with the National Education Curriculum

Intervention planning (Prevention Leadership and Action Teams)

Step by step implementation and linkage to school's education curriculum

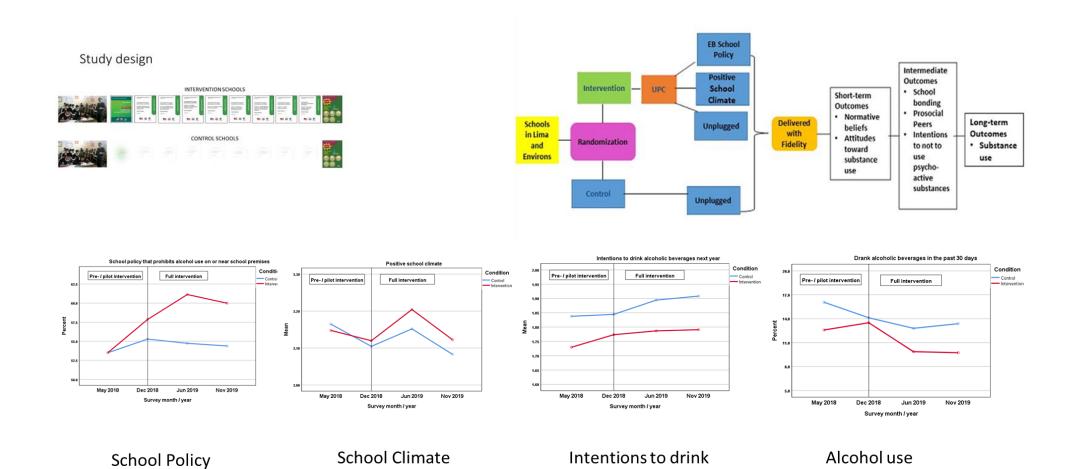

Piloting each component of the intervention and feedback for quality adjustment

Intervention results

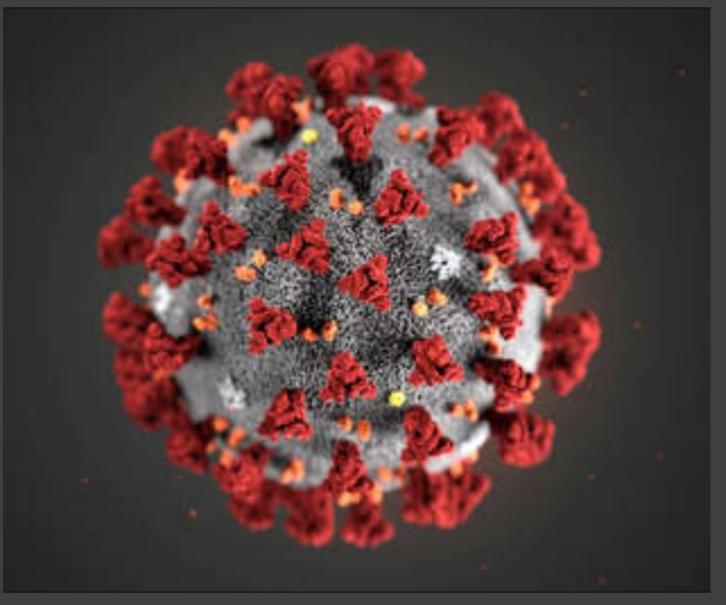

Conclusions

- The universal prevention training curriculum and related school policy and climate changes were effective in reducing substance use and related problems among Peruvian adolescents.
- This randomized controlled trial of the UPC school curriculum provides initial evidence in support for UPC training as an effective means of disseminating prevention science concepts, skills, and practices designed to support the implementation of evidencebased interventions in developing countries.

CH 2020 ID-19 PANE

Adaptation for online and remote implementation

Sustaining substance use prevention and COVID-19 policies

Los discursos persuasivos de compromiso con la prevención y comunicados sobre el programa se adaptan al espacio virtual, utilizando <u>material</u> audiovisual y las redes sociales como medio de transmisión Los docentes descubren habilidades en si mismos para el uso de las herramientas, realizan juego de roles Los estudiantes entran en acción y se dirigen a sus pares

Sustaining activities with children at home
